

# NORDIC PANORAMA DESIGN

LED pendant, model **GLACIER** from ODSIF. Inspired by Nordic nature – here a fantastic landscape opening up to you when hiking in the mountains at Skaftafell in Iceland. Looking into the valley Morsárdalur gives you an impression of being part of Lord of the Rings. This magnificent and open landscape and the beautiful colours inspired ODSIF to make this LED pendant with an open design in the middle with curved white shades and silver-coloured pipes holding the lamp together and containing the small LEDs, which shine on the white shades and spreads the light out into the room.

## **ENERGY-FRIENDLY LED**

The LED pendant has soft power on/off and dimmer function. Furthermore, it is energy-friendly and there is no need for changing bulbs - the LEDs have a long lifespan (approx. 50.000 hours). Power consumption: 16W. Luminous intensity up to 970 lm.

## **STYLISH COLOURS MATCHING ANY INTERIOR**

Produced from aluminium with white shades. The diameter of the lamp is 32 cm and the height is 32 cm. The pendant is available with pre-set light themes (reading light, cosy light and other toned themes), or as model with warm-white LEDs only.

## **WALL SWITCH AND/OR SMARTPHONE**

The lamp is operated from wall switch, but if you are riding the SmartPhone wave, it is also possible to operate the lamps via the SmartPhone.

Recommended retail prices: EURO 361.- with warm-white LED. Price with built-in light themes: EURO 730.-.
